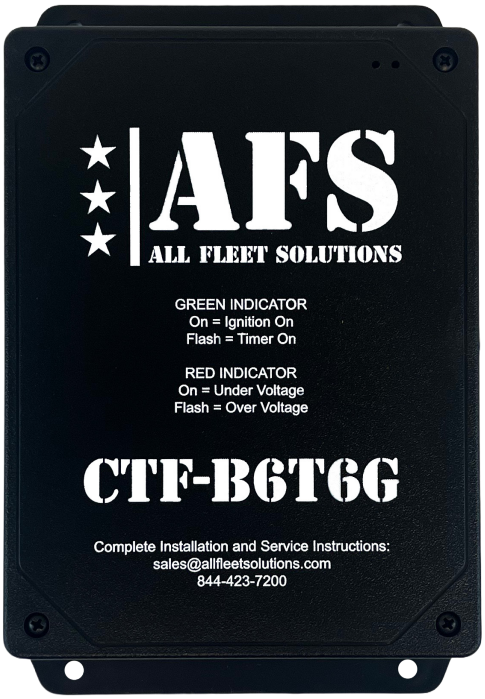
CTF-B6T6G

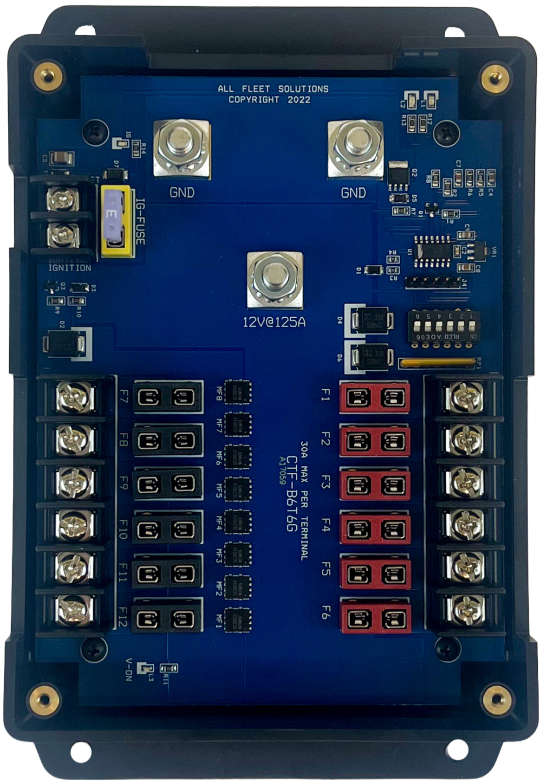
PROGRAMMABLE 12-CIRCUIT POWER MANAGEMENT

The CTF-B6T6G is built for law enforcement, fire and EMS, utility, municipal, telecommunications, and commercial service vehicles that need both constant and timed power for mobile computers, radios, routers, cameras, and other onboard devices. Its compact enclosure fits in center consoles and electronics trays where space is limited.



PRODUCT FEATURES:

The CTF-B6T6G provides six battery-hot circuits and six timed circuits with a two-stud ground bus, supporting up to 125 amps of total load. An integrated timer offers 16 timed intervals, Infinite Mode, low-voltage disconnect, and diagnostic LEDs to protect the battery and simplify troubleshooting. A momentary input instantly activates two-way radios, even when the vehicle is off, and a reset function restarts onboard IT devices without cycling vehicle power.



SPECIFICATIONS:

- 12 Fused Outputs
- 6 Battery Hot, 6 Timed Hot circuits
- 125A Max Total Load, and 30A max per terminal
- Battery Hot circuits (F1–F6): 100A max load
- Timed Hot circuits (F7–F12): 75A max load
- Integrated Voltage Sensing Delay Timer
- 16 Timed Intervals and Infinite Mode
- Low-Voltage Disconnect at 11.00 or 11.75 VDC
- Reset Function
- Instant Activation & Ignition Override
- Diagnostic LEDs
- 2-Stud Ground Bus, 2 Rings per M6 Stud, 125A Max
- Dimensions: L 6.1”, W 4.6”, H 1.2”
- Weight: 0.806 lbs.
