

Product Features:

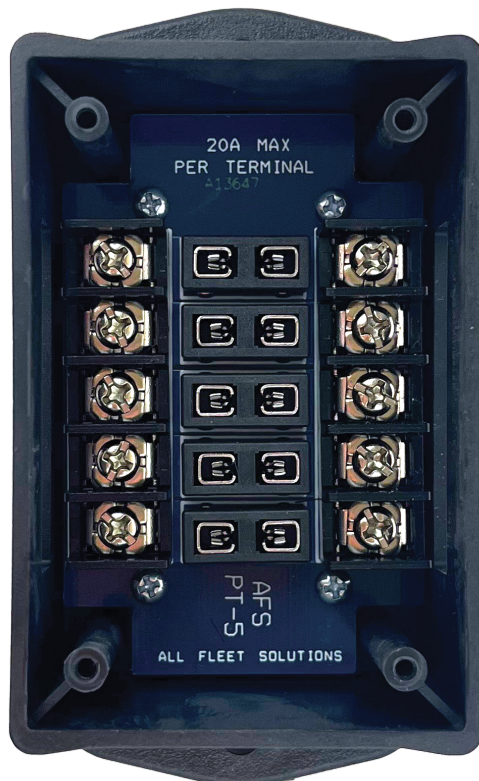

The PT-5 is a compact five-position mini fuse holder designed to provide reliable circuit protection for auxiliary vehicle electronics. Each of its five fused circuits features an independent input terminal, allowing flexible integration into a wide range of electrical systems. Rated for up to 20 amps per circuit, the PT-5 is ideal for adding protected power circuits without increasing installation complexity. It also supports an optional mini fuse format diode, simplifying the protection of video system triggers and vehicle sense circuits. Compact and easy to install, the PT-5 delivers a practical solution for expanding and protecting vehicle electrical systems.

Recommended Application:

The PT-5 is ideal for adding fused circuits to law enforcement, fire, EMS, utility, municipal, and commercial fleet vehicles. It is well suited for powering cameras, lighting, communication equipment, sensors, and other aftermarket accessories that require dedicated circuit protection. Its compact design makes it easy to install in space-constrained locations, while the optional fuse-format diode simplifies integration with video systems and vehicle trigger circuits. The PT-5 is an efficient solution for both new vehicle upfits and electrical system expansions.

Technical Data:

- 20A maximum per circuit
- 5-position Mini Fuse holder
- Dimensions: L 4.05", W 2.07", H 1.58"
- Weight: 0.212 lbs
