P18-FLEX-DT

CONFIGURABLE FOR COMPLEX FLEET ELECTRICAL SYSTEMS

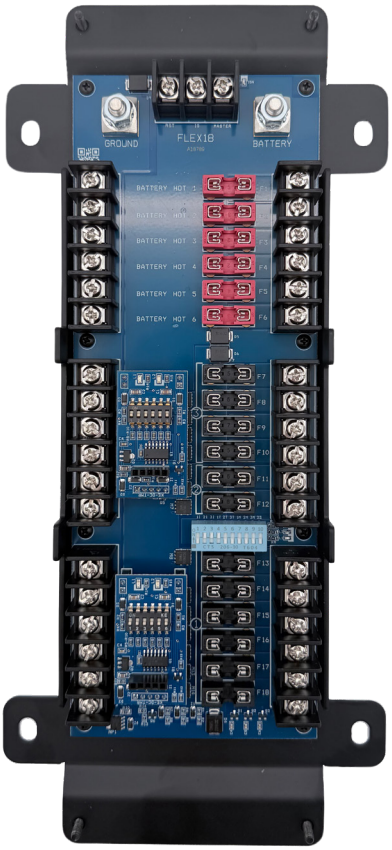

The P18-FLEX-DT is built for law enforcement and emergency vehicles running multiple onboard electronic systems. It powers light and siren controllers, mobile computers, radios, routers, cameras, and other mission-critical equipment. The field-programmable outputs allow agencies to standardize their vehicle builds while still accommodating different equipment packages.

PRODUCT FEATURES:

The P18-FLEX provides 18 fused outputs: six battery-hot circuits and three flex zones, each of which can be set for ignition, master-switched, or timed power. The P18-FLEX-DT adds a second timer for two independently controlled timed zones, each offering 16 timed intervals, Infinite Mode, low-voltage disconnect, and diagnostic LEDs to protect the battery and simplify troubleshooting. A momentary input instantly activates critical communication equipment, and a reset function restarts onboard IT devices without cycling vehicle power.

SPECIFICATIONS:

- P18-FLEX-DT includes two DC-TMD Timer Cards
- 18 Fused Outputs
- 6 Battery Hot, 12 Flex circuits
- 125A Max Total Load, and 30A max per terminal
- 3 Field-Programmable Flex Zones: 2, 4, and 6 Circuits
- Flex Circuits can be Ignition, Master, Timer 1, or Timer 2
- 16 Timed Intervals and Infinite Mode
- Provides two independently timed DC-TMD Voltage Sensing Delay Timers
- Low-Voltage Disconnect at 11.00 or 11.75 VDC
- Reset Function
- Instant Activation & Ignition Override
- Diagnostic LEDs
- 18-Position Ground Bus
- Dimensions: L 12.510”, W 5.750”, H 1.560”
- Weight: 2.966 lbs.
- All Fleet Solutions reserves the right to upgrade and improve products without notice.
